I am a UI/UX designer whose motivation is to exceed expectations, with over 2 years of experience within the industry. During this time, I gained experience in developing designs for websites in various fields of activity. I approach each project individually. I am set for professional growth with each project, open to gaining new knowledge and mastering new technologies.

Domains in which I worked: Logistics and transport (B2B, B2C), Healthcare, Insurance, E-commerce

I had to work hard to become a UI/UX designer. I have a pharmaceutical education and have been successfully working as a pharmacist for 4 years. But I did not see any prospects for myself in medicine, although I like to take care of people. Now I care about users by studying their behavior and preferences to create the best user experience for them. Therefore, I am very self-motivated and work hard every day for future success.
